SUMMARY

Analytics and data science leader with 12+ years building marketing measurement, attribution, and advanced analytics capabilities for Fortune 100 firms managing \$1B+ annual, multi-channel marketing budgets. Deep expertise in Marketing Mix Modeling, multi-touch attribution, causal inference, and A/B testing/experimentation, with a track record of translating complex model findings into executive-ready decisions for senior leadership and cross-functional stakeholders. 6+ years leading and scaling cross-functional data science teams (including offshore/onshore contractor resources), with a proven record of mentoring analysts and data scientists and driving multi-million dollar measurement ROI.

EDUCATION

University of Wisconsin Oshkosh | Oshkosh, Wisconsin Spring 2020
Master of Science in Data Science

Illinois State University | Normal-Bloomington, Illinois Winter 2012
Bachelor of Science, Mathematics and Economics (double major)

EXPERIENCE

AbbVie | Mettawa, Illinois Jan 2023 – Current
Associate Director | Advanced Analytics and Innovation

- Solution owner of AbbVie's Marketing Mix Modeling (MMM) solution, the primary data-driven input optimizing \$1B+ annual, multi-channel, multi-brand marketing budget, powered by 20+ data pipelines and 20 Bayesian linear regression models; in-housed the solution, saving an expected \$2M annually
- Led implementation of AbbVie's first GBM-based multi-touch attribution (MTA) model, a model-derived measurement solution used to optimize marketing spend
- Led design and implementation of a custom web application enabling 50+ business analysts to run interactive decision tree analysis, saving 200+ hours annually and improving insight quality
- Built a time-series anomaly detection solution saving 600+ hours per year
- Lead 3 direct reports and manage 12+ onshore/offshore contractor resources; mentor aspiring data scientists across 3 cross-functional development programs
- Recipient of Data Scientist of the Year at AbbVie (2025)

Salesforce | Remote, Illinois Dec 2021 – Jan 2023
Lead Data Scientist | Marketing Analytics and Data Science

- Principal developer building a new B2B multi-touch attribution (MTA) marketing measurement solution from the ground up, used to optimize marketing budget allocation impacting millions of dollars in annual spend across marketing and salesforce
- Owned end-to-end delivery of new measurement capabilities: roadmap planning, data engineering, modeling, and executive stakeholder presentations up to SVP level
- Used BigQuery and Snowflake SQL for data manipulation, Python for modeling, and Tableau for dashboarding
- Led 3 direct reports and 3 contractor resources contributing to the MTA build

Argo Group | Remote, Illinois Jun 2021 – Dec 2021
Senior Data Scientist | Customer Acquisition & Product Strategy

- Built a machine learning model (Python) to predict prospect conversion probability, re-prioritizing underwriter lead-working order from received-order to model-ranked order
- Drove an increase in total new customers acquired, generating approximately \$670K in incremental annual written premium
- Established a new approach for measuring customer acquisition after identifying existing measurement and KPIs as unideal

Allstate Insurance Company | Northbrook, Illinois Feb 2016 – Jun 2021

Lead Data Scientist | Marketing Analytics and Data Science

- Led effort to in-house Marketing Mix Modeling using a Bayesian solution built in PyMC, saving ~\$800K annually by eliminating an external vendor; insights informed cross-channel performance assessment for a \$1B+ annual budget
- Deployed Allstate's most sophisticated real-time bidding ML solution, the first to leverage lifetime customer value and directly run campaigns in the marketing platform, optimizing \$20K/day in spend
- Engineered Allstate's offline Multi-Touch Attribution system for search engine and click-to-call channels
- Completed advanced causal/uplift modeling using PyLift, CausalML, and CausalImpact
- Built Tableau dashboards regularly used by 100+ stakeholders; managed 5 reports responsible for Python, SQL, and Tableau development and performance

SKILLS

Marketing Mix Modeling (MMM), Multi-Touch Attribution (MTA), Causal Inference, A/B Testing & Experimentation, Uplift & Causal Modeling (PyLift, CausalML, CausalImpact), Marketing Measurement Science, SQL, BigQuery, Snowflake, Python, R, Tableau, Dataiku, Sagemaker, Google Ads, Adobe Analytics, Stakeholder Management, Change Management, Team Leadership & Mentoring, Data Science End-to-End Project Facilitation, Building GBM Based Models, Linear/Logistic Regression, Principal Component Analysis, Customer Segmentation, Propensity & Churn Analysis, Data Visualization Best Practices, Web Application & Dashboard Development, Graph Database & Graph Analytics, AI Assisted Coding, Claude Code, Github, Neo4j
