SUMMARY

Analytics and data science leader with 12+ years driving marketing and product measurement strategy for Fortune 100 companies with \$1B+ annual, multi-channel budgets. Deep expertise spanning Marketing Mix Modeling (MMM), multi-touch attribution (MTA), incrementality testing, causal inference, and A/B experimentation, with a track record of translating complex, technical findings into executive-ready narratives that shift budget and product decisions. 8+ years leading and developing cross-functional analytics/data science teams (direct reports plus 12+ onshore/offshore contractors), building self-serve analytics tooling adopted by 50-100+ business stakeholders, and partnering directly with SVP/C-suite leadership. Recipient, AbbVie Data Scientist of the Year (2025).

EDUCATION

University of Wisconsin Oshkosh Oshkosh, Wisconsin Master of Science in Data Science	Spring 2020
Illinois State University Normal-Bloomington, Illinois Bachelor of Science, Mathematics and Economics (double major)	Winter 2012

EXPERIENCE

AbbVie Mettawa, Illinois <i>Associate Director Advanced Analytics and Innovation</i>	Jan 2023 – Current
--	--------------------

- Solution owner of AbbVie's Marketing Mix Modeling (MMM) platform, the primary data-driven input optimizing \$1B+ in annual, multi-channel, multi-brand marketing spend, powered by 20+ data pipelines and 20+ Bayesian regression models
- Lead implementation of a GBM-based MTA model, the first model-derived attribution solution at AbbVie, informing marketing measurement strategy
- Designed and shipped a self-serve web application enabling 50+ business analysts to run interactive decision-tree analysis, saving 200+ analyst-hours/month and improving insight quality, a direct analog to driving Looker/GrowthBook-style self-serve analytics adoption
- Built a time-series anomaly detection solution saving 600+ hours/year, strengthening real-time monitoring of guardrail metrics across the business
- Manage the MMM solution as a continuously-evolving product, balancing long-horizon roadmap work with time-sensitive stakeholder requests
- Lead 3 direct reports and manage 12+ onshore/offshore contractor resources; run 3 concurrent cross-functional mentorships developing aspiring data scientists' career paths
- Recognized as Data Scientist of the Year (2025) for measurement innovation and cross-functional impact

Salesforce Remote, Illinois <i>Lead Data Scientist Marketing Analytics and Data Science</i>	Dec 2021 – Jan 2023
---	---------------------

- Principal developer of a new B2B multi-touch attribution (MTA) solution built from the ground up, used to optimize entire marketing budget, impacting millions in annual marketing and sales spend
- Owned the solution end-to-end: roadmap definition, data engineering (BigQuery, Snowflake SQL), modeling (Python), dashboarding (Tableau), and executive presentation, including direct readouts to SVPs
- Led 3 direct reports and 3 contractor resources contributing to attribution and measurement projects
- Experience directly transferable to leading a transition from MTA toward incrementality-based measurement: built the attribution foundation, understood its methodological limits, and communicated where model-based and holdout-based views diverge

Argo Group Remote, Illinois <i>Senior Data Scientist Customer Acquisition & Product Strategy</i>	Jun 2021 – Dec 2021
--	---------------------

- Built a machine learning model predicting prospect-to-customer conversion probability (Python), replacing FIFO lead handling for underwriters with a data-prioritized queue

- Drove an increase in new customer acquisition, generating ~\$670K in incremental annual written premium
- Identified gaps in existing acquisition measurement and KPIs and established a new, more rigorous measurement approach, early experience defining "hero" and guardrail metrics for a business function lacking them

Allstate Insurance Company | Northbrook, Illinois

Feb 2016 – Jun 2021

Lead Data Scientist | Marketing Analytics and Data Science

- Deployed Allstate's most sophisticated real-time-bidding ML solution to date, first to leverage lifetime customer value and run directly in the marketing platform, optimizing \$20K/day in spend
- Led in-housing of Marketing Mix Modeling using a Bayesian solution (PyMC), saving ~\$800K annually versus external vendor while informing cross-channel performance assessment for a \$1B+ annual budget
- Delivered advanced causal/incrementality work: uplift and causal modeling using PyLift, CausalML, and CausalImpact, directly applicable to geo holdout and go-dark incrementality test design
- Engineered Allstate's offline multi-touch attribution system for search and click-to-call channels
- Built Tableau dashboards used regularly by 100+ stakeholders across the marketing organization
- Managed 5 direct reports, owning their development and performance across Python, SQL, and Tableau workstreams

SKILLS

A/B Testing & Experimentation, Adobe Analytics, BigQuery, Causal Inference, Change Management, Claude Code / AI-Assisted Coding, Cross-Functional Influence, Customer Segmentation, Data Science End-to-End Project Facilitation, Data Science Mentorship & Talent Development, Dataiku, Executive & C-Suite Communication, GBM-based Modeling, Github, Google Ads, Incrementality Testing, Linear/Logistic Regression, Marketing Mix Modeling (MMM), Multi-Touch Attribution (MTA), Neo4j (Graph Analytics), PCA, Propensity & Churn Analysis, Python, R, Sagemaker, Snowflake, SQL, Tableau, Team Leadership (8+ years with direct reports; 12+ onshore/offshore contractors), Uplift Modeling
