SUMMARY

Analytics and data science leader with 12+ years driving measurable ROI across Fortune 100 marketing organizations with \$1B+ annual, multi-channel budgets. Deep expertise spanning experimentation & causal inference, marketing mix modeling (MMM), multi-touch attribution (MTA), and customer retention/acquisition analytics. Proven track record building analytics functions from the ground up — owning roadmap, data engineering, modeling, and executive storytelling. 8+ years leading and developing cross-functional teams of data scientists, analysts, and contractors (onshore/offshore); trusted thought partner to VP- and SVP-level stakeholders on investment decisions. Recipient, AbbVie Data Scientist of the Year (2025).

EDUCATION

University of Wisconsin Oshkosh Oshkosh, Wisconsin Master of Science in Data Science	Spring 2020
Illinois State University Normal-Bloomington, Illinois Bachelor of Science, Mathematics and Economics (double major)	Winter 2012

EXPERIENCE

AbbVie Mettawa, Illinois <i>Associate Director Advanced Analytics and Innovation</i>	Jan 2023 – Current
--	--------------------

- Solution owner for AbbVie's enterprise Marketing Mix Modeling (MMM) platform — the primary data-driven input optimizing a \$1B+ annual, multi-channel, multi-brand marketing budget; solution powered by 20+ data pipelines and 20+ Bayesian regression models, managed as a continuously-evolving product
- Leading in-house build-out of MMM capability, projected to save \$2M annually in external vendor cost
- Led design and implementation of a custom self-serve web application enabling 50+ business analysts to run interactive decision-tree analysis — saving 200+ hours/year and surfacing insights analysts previously missed
- Built a time-series anomaly detection solution saving 600+ hours/year across the analytics organization
- Led first-ever model-derived (GBM) MTA solution at AbbVie, extending measurement rigor beyond MMM
- Lead 3 direct reports and 12 contractor resources (onshore/offshore); run 3 concurrent cross-functional mentorships developing career paths for aspiring data scientists
- Recipient, AbbVie Data Scientist of the Year (2025)

Salesforce Remote, Illinois <i>Lead Data Scientist Marketing Analytics and Data Science</i>	Dec 2021 – Jan 2023
---	---------------------

- Principal developer building Salesforce's first B2B multi-touch attribution (MTA) solution from the ground up, used to optimize marketing budget allocation impacting millions of dollars in annual spend across marketing and sales
- Owned end-to-end delivery: roadmap definition, data engineering (BigQuery, Snowflake SQL), Python modeling, Tableau dashboarding, and executive storytelling — presenting directly to SVP stakeholders
- Led 3 direct reports and 3 contractor resources contributing to attribution and measurement workstreams

Argo Group Remote, Illinois <i>Senior Data Scientist Customer Acquisition & Product Strategy</i>	Jun 2021 – Dec 2021
--	---------------------

- Built a machine learning propensity model (Python) to score and prioritize prospect conversion likelihood, replacing first-come-first-served lead handling with a data-driven priority queue for underwriters
- Drove an increase in new customer acquisition, generating ~\$670K in incremental annual written premium
- Diagnosed shortcomings in existing acquisition KPIs and designed a new customer acquisition measurement framework — foundational segmentation and metric-design work directly analogous to retention/guardrail metric design

Allstate Insurance Company Northbrook, Illinois <i>Lead Data Scientist Marketing Analytics and Data Science</i>	Feb 2016 – Jun 2021
---	---------------------

- Deployed Allstate's most sophisticated real-time bidding ML solution to date — first to leverage customer lifetime value directly within the live media platform — optimizing \$20K/day in media spend
- Led in-housing of Marketing Mix Modeling using a Bayesian (PyMC) approach, saving ~\$300K annually in vendor cost while assessing cross-channel performance for a \$1B+ annual budget
- Engineered Allstate's offline Multi-Touch Attribution system across search and click-to-call channels
- Applied uplift and causal inference methods (PyLift, CausalML, CausalImpact) to isolate true campaign impact from correlation
- Built Tableau dashboards used regularly by 100+ stakeholders; managed and developed 5 direct reports
