SUMMARY

Analytics and data science leader with 12+ years of experience building and scaling marketing measurement, experimentation, and analytics capabilities for Fortune 100 companies with \$1B+ annual, multi-channel marketing budgets. Hands-on expertise across Marketing Mix Modeling (MMM), multi-touch attribution (MTA), causal/uplift modeling, and propensity and segmentation analysis. Experienced presenting technical findings to senior leadership, including SVPs, to inform roadmap and budget decisions. 8+ years managing direct reports and large onshore/offshore vendor teams (12+ contractors), with a consistent record of hiring, developing, and retaining high-performing analytics talent.

EDUCATION

University of Wisconsin Oshkosh Oshkosh, Wisconsin M.S., Data Science	Spring 2020
Illinois State University Normal-Bloomington, Illinois B.S., Mathematics & Economics (double major)	Winter 2012

EXPERIENCE

AbbVie Mettawa, Illinois <i>Associate Director, Advanced Analytics and Innovation</i>	Jan 2023 – Present
---	--------------------

- Solution owner for AbbVie's Marketing Mix Modeling (MMM) product — the primary data-driven input optimizing \$1B+ in annual, multi-channel, multi-brand marketing spend; solution powered by 20+ data pipelines and 20 Bayesian regression models, managed with continuous, product-style innovation
- Led implementation of a GBM-based multi-touch attribution (MTA) model — AbbVie's first model-derived measurement solution
- Led design and implementation of a self-serve web application enabling 50+ business analysts to run interactive decision-tree analysis, saving 200+ hours/year and helping analysts surface insights they might otherwise have missed
- Built a time-series data anomaly detection solution saving 600+ hours/year
- Lead a team of 3 direct reports and 12 onshore/offshore contractors
- Serve as cross-functional mentor across 3 mentorships, overseeing career development plans for aspiring data scientists
- Recipient of AbbVie Data Scientist of the Year (2025)

Salesforce Remote, Illinois <i>Lead Data Scientist, Marketing Analytics and Data Science</i>	Dec 2021 – Jan 2023
--	---------------------

- Principal developer of a new B2B multi-touch attribution (MTA) marketing measurement solution built from the ground up, used to optimize the entire marketing budget — impacting millions of dollars in annual spend across marketing and salesforce
- Owned the end-to-end build of this new capability: roadmap, data engineering (BigQuery, Snowflake SQL), modeling (Python), and dashboarding (Tableau), including presentations to stakeholders such as SVPs
- Led 3 direct reports and 3 contractor resources contributing to the projects

Argo Group Remote, Illinois <i>Senior Data Scientist, Customer Acquisition & Product Strategy</i>	Jun 2021 – Dec 2021
---	---------------------

- Built a machine learning model (Python) to predict prospects' probability of converting into new customers, replacing first-in/first-out lead handling with ML-prioritized lead routing for underwriters
- This project increased total new customers acquired, generating approximately \$670K in incremental written premium annually
- Established a new approach for measuring customer acquisition at Argo, replacing existing measurement and KPIs that were unideal

Allstate Insurance Company Northbrook, Illinois <i>Lead Data Scientist, Marketing Analytics and Data Science</i>	Feb 2016 – Jun 2021
--	---------------------

- Deployed Allstate's most sophisticated real-time bidding machine learning solution to date — the first to leverage lifetime customer value and run the campaign directly in the marketing platform — optimizing \$20K/day
- Led the effort to in-house Marketing Mix Modeling using a Bayesian solution built via PyMC, saving approximately \$300K annually by eliminating an external vendor; insights used to assess cross-channel performance for an overall annual budget of \$1B+
- Completed advanced marketing data science projects including uplift and causal modeling (PyLift, CausalML, CausalImpact) and engineering Allstate's offline multi-touch attribution system for search engines and click-to-call channels
- Built Tableau dashboards regularly used by 100+ stakeholders
- Managed 5 direct reports, responsible for their development (on tools such as Python, SQL, and Tableau) and performance
